Compose an essay: Some people think that online shops will eventually replace entity shops (offline shops). What is your opinion? Write a 300-word argumentative essay stating your views.

由题干可知本文是一篇对比议论类的文章,作文思路如下: 开头段: 提出主题

Although online shopping is popular, there are still some different views.

主体段: 论证主题	
①on one hand,	_(分论点一)+举例子
20n the other hand,	(分论点二)+举例子
<pre>③As far as I am concerned,</pre>	(分论点三)
+举例子	
结尾段: 自己的观点,总结升华。	

Nowadays, there are more and more people shopping online. If you ask ten people whether they shop online, nine people will tell you 'yes'. Although online shopping is popular, there are still some different views. Anyway, online shops will not replace entity shops in the near future.

On the one hand, online shopping has many advantages. The first one is that it's very convenient for you to buy things. That's to say, you just need to spend few minutes looking for your pre fence and clicking the buttons and then wait for its coming. All the process only needs a little time and you even don't need to move your legs! The second one is that you can compare the prices which are different in various shops so as to find out the most cheap as well as the best ones. Besides, last but not least, online shopping provides a way for those who live in remote places and have difficulty going to shopping.

On the other hand, online shopping also has some disadvantages. Firstly, there are many wrong advertisements on the Internet and clients are often cheated and lose lots of money. What's more, the Internet is visual and we can only see the goods rather than touching them, which lets us have false views and then make wrong decisions. Moreover, most goods that are shown on the Internet are different from the true things, which makes some customers unsatisfied when they receive the goods. Besides, in the entity store, people can communicate with the salesperson face to face without any interference, which is not available in online shop. Therefore, many people tend to buy things in entity stores which can secure their satisfaction.

As far as I am concerned, whatever the thing is, we should see the Internet in different perspectives. Although there are many dangers on the Internet, online shopping has wide home markets. As long as we use it properly, it can benefit our lives! However, the online shop can not replace the entity shop for the time being. Because, there is still a long way to go for all the generations to accept the new shopping behaviour.

First and foremost, remembering that we are Chinese not just people is the most vital thing that we should bear in mind before our departure for other countries. If we do offensive conduct in public places, it is the China that will be humiliated besides ourselves. This illustrates the necessity of minding our behaviour when we are in trips. Keeping good

Additionally, we need to focus on the cultural differences. In fact, the cultural difference has its advantages and disadvantages. Compose an essay.

Some people argue that a college degree does not necessarily mean the holder has superior intellect or stronger capability. What is your opinion? Write a 300-word argumentative essay stating your views.

开头段: 提出主题

In my opinion, college degree is a recognition of ability in general.

主体段: 论证主题

①On one hand, _____ (分论点一)+举例

②0n the other hand, _____(分论点

二)+举例子

③But in fact, _____(分论点三) +

举例子

结尾段:自己的观点,总结升华。

With the continuous promotion of China's strategy of "strengthening the country with talents", there are more and more college graduates in China. Some people think that the higher their educational background, the stronger their ability. In my opinion, college degree is a recognition of ability in general.

On the one hand, being able to successfully complete four years of study and obtain a graduation certificate means that the person's learning ability and problem-solving ability have reached the national standard of being a college student. Therefore, a degree is an indication of one's ability.

On the other hand, during the four years in university, the students studied not only the knowledge in books, but also a way of thinking. They learn to use this way to solve the problems in real life. This ability of using knowledge to solve problems will gradually give full play to its

advantages in later work.

But in fact, some college students did not spend their college time as we expected. They attend parties all day, play games, sleep and don't focus on their studying. Yet eventually they can even get a graduation certificate. Therefore, the degree of this group of people with academic certificates does not mean that their abilities are better than those with lower academic qualifications.

As far as I'm concerned, college degree is a recognition of people's ability. But only through real hard work can the ability of those who have

obtained this diploma be truly strong.

When young people look for fake boy/girlfriends to spend holidays with, they often turn to "rent-a-boy/girlfriend" services online. Write a 300-word expository essay exploring the effects of this phenomenon.

主体段: 转折, 表明观点+论证观点 ①First of all, 患)	(人身安全方面的隐
②Secondly, 患)	(诈骗犯罪方面的隐

With the renewal of the times and the improvement of people's ideas, more and more young people are inclined to live alone and marry and have children later. However, in some special situations, it is still necessary for a boyfriend / girlfriend to exist. As a result, some young people will turn to "rent-a-boy/girlfriend" services on the Internet to keep company when they go on vacation.

However, in my opinion, there are many hidden dangers in this service.

First of all, according to China's laws, one's body cannot be rented. "Rent-aboy/girlfriend services on line is very easy to encounter dangerous events, whether for the lessor or the lessee. A news item on the Internet caught my attention before. A 23 - year - old girl, who offered a rental service on the Internet and offer accompany on the tour, was finally abducted. There are countless examples like that in recent years. Therefore, this kind of human rental service has great potential safety hazard, which provides opportunities for many criminals and will lead to social instability and increase in crime rate.

Secondly, online fraud has always existed. This kind of online rental service can be used easily to become a fraud by criminals. They may cheat money by asking for

deposit, etc., which will also lead to an increase in crime rate in society.

In addition, young people should learn to integrate into society and call a few close friends. Even if you don't want to find a boyfriend or girlfriend, you can still get warmth and help when you need friends in your life. This "rent-aboy/girlfriend services on the internet, on the one hand, shows the lack of people's interpersonal relationships. On the other hand, it will also make these young people

to treat their emotion in a more casual way.
As far as I am concerned, "rent-a-boy/girlfriend" services is an unreasonable phenomenon with many potential safety hazards. The government should strengthen supervision and help young people to enhance their interpersonal skills.
